New project: Impacts of ICE detentions and deportations in Massachusetts

Dear LZC friends, partners, and supporters,

We are conducting a project to learn about the impacts of ICE detentions and deportations on Massachusetts families through stories from the community.

Our goal is to **collect and analyze a bank of 100+ verified stories of Massachusetts families** who have been directly **impacted by ICE detentions and/or deportations**. We plan to complement this story bank with a list of relevant data points from organizations that have witnessed impacts on the greater community (such as schools, police, healthcare organizations, social services, etc).

How to participate:

- **Are you a community or faith-based leader, healthcare provider, advocate, immigration attorney, service provider, or other community member** who can share a short de-identified story of how your immigrant clients, patients, workers, neighbors or family members have been affected by ICE detentions and deportations?
  - Submit your short stories into **this form** or copy and paste this link into your browser: **https://forms.gle/acyXDNK2G1CUBRxw8**
  - Sign up **at this Calendly link** for a 15-minute phone call with an LZC team member to verbally share your stories. Calendly link **https://calendly.com/lzc-icommunityhealth/ice-impacts-in-massachusetts**:

The information you share with us is confidential and will only be read by members of the LZC team. We ask you not to share people's names or any other identifying information in the stories you report. We will analyze the stories shared and prepare a public report to inform our collective understanding of the immigration detention and deportation landscape in Massachusetts.

If you have any questions, contact the LZC team (**lzc@icommunityhealth.org**) or Dr. Jessica Santos, LZC director at **jsantos@icommunityhealth.org** or (617) 845-3768.

Best,
LZC team
